

STRESS

I am not sure exactly how it works, but this is amazingly accurate.

Read the full description then look at the picture.

The picture below has 2 identical dolphins in it. It was used in a case study on stress levels at St.Mary's Hospital.

Look at both dolphins jumping out of the water. The dolphins are identical. A closely monitored, scientific study revealed that, in spite of the fact that the dolphins are identical, a person under stress would find differences in the two dolphins. The more differences a person finds between the dolphins, the more stress that person is experiencing.

Look at the photograph and if you find more than one or two differences you need to go on holiday.

No Need to Reply, I'll be on holiday

Never take life seriously.. Nobody gets out alive anyway...
